

Scalar L/XL Premium/XL Premium 40 : Assembly manual

Scalar L

Scalar XL Premium 40

This page shows the different steps needed for the full assembly of your Scalar L and XL premium 3D printer.

Each step is described in details with the addition of Pdf 3D.

Requirements:

1. [Tools](#)
2. [The different kinds of extrusion profiles](#)

[A few words of Pdf 3D](#)

Pdf3D are integrated along the documentation to give you more details on the possible missing points of view or to clarify the existing ones.

For more information on how to use them please take a few moments to look into the manual:

- [A few words on Pdf 3D](#)

Assembly Manual

1. [Chassis Assembly](#)
2. [Dual Drive system for Heatbed](#)
3. [Aluminium Heatbed assembly](#)
4. [12V power supply installation](#)
5. [Strong jaws assembly](#)
6. [Z and Y Axis wiring](#)
7. [X Axis Assembly \(Horizontal\)](#)
8. [X Axis belt installation](#)
9. [BLTouch installation](#)
10. [hot end installation \(E3D V6\) and X axis end stop](#)
11. Installation de la tête chauffante (Hexagone)

12. [Installation de la tête chauffante \(1730\)](#)
13. [Dual extrusion kit setup \(Upgrade\)](#)
14. [Titan Extruder Assembly \(Upgrade\)](#)
15. [Direct drive assembly](#)
16. [Aluminium spool holder installation](#)
17. [Montage de l'électronique sur le châssis](#)
18. [Electronic wiring](#)
19. [Chassis reinforcement Kit \(XL Premium 40 or upgrade\)](#)

First Steps

1. [First use caution](#)
2. [Commissioning your 3D printer](#)
3. [Filament installation \(Bowden version\)](#)
4. [First steps with cura](#)
5. [what is the best layer height for your 3D printer](#)
6. [Firmware upgrade \(Version 1.1.5 available 22/09/2017\)](#)
7. [Need some Help ? Read the FAQ](#)

Pre assembled parts documentation

1. [12V 360W PSu assembly](#)
2. [E3D V6 Hot end assembly](#)
3. [AllInOne full metal hot end assembly](#)
4. [Aluminium heatbed V2 assembly \(full aluminium\)](#)

Calibration

1. [Extruder calibration](#)
2. [how to improve the quality of the shells on your prints](#)

Misc

1. [Play music at the end of your prints](#)
2. [Convert your ATX power supply for your 3D printer](#)
3. [Inductor probe wiring \(lj12a3-4-zbx 12V\)](#)

upgrades :

- [Bed stabilization \(Dual Drive System\)](#)
- [Chassis Reinforcement kit](#)
- [Raspberry pi + Octoprint](#)
- [TFT 2.8" Touch screen](#)
- [BLTouch](#)
- [Titan Extruder](#)
- [Power supply auto shutdown module \(PS_ON\)](#)
- [Dual extrusion kit](#)
- [Runout Sensor module](#)
- [Helix drive system](#)
- [ClosedLoop stepper motors](#)
- [High temperature PT100 Module](#)
